PROJECTS

Rock, Paper, Scissors game

- Developed a Rock, Paper, Scissors game with an integrated ELO rating system and a Tkinter-based GUI in Python.
- The project involved refining game logic, implementing a rating system to track player performance, and creating both console and graphical versions of the game.
- Managed the project using Git, including combining multiple repositories, maintaining code versioning, and ensuring proper documentation of the development process.

Blackjack AI Simulator,

- Used C++ to build the card game Blackjack.
- Created different player AI strategies and ran simulators to see which one had the highest winning percentage.
